

The Still Axioms

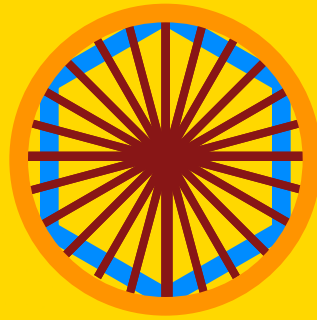

Beyond the rivalries of preservation and transformation exist the Still Axioms. These entities are not born of belief, ambition, tradition, or rebellion, but purely of necessity. They do not govern by will, nor do they contend for worship. Instead, they embody the underlying principles that allow reality itself to function: the cycles that proceed unseen, the patterns that persist without intention, and the quiet structures that remain when gods disagree or mortals forget. The Still Axioms neither intervene nor judge unless the foundations of existence are threatened, and when they do act, it is not to restore balance between sides, but to preserve the conditions that make balance possible at all.

Aulreth

"The Unobserved Cycle"

Governs cycles without witnesses.
Stars collapsing unseen, species that die unnoticed, and worlds that never mattered.

Keprathix

"The High Collective"

Maintains collective instinct. Swarms and hives, particularly in the most ancient of underground creatures, are governed by Khepraxis. Cooperation without individuality

Myceluun

"The Great Interlace"

Myceluun is connection itself. It decomposes the dead, feeds the living, and remembers everything biologically.
